

Angel Mendez

Software developer

Work experience

since 05/18 **Fullstack developer**

[Wearable Technologies S.L](#)

I've worked in multiple Web and mobile application projects for IoT, wearables and 4.0 Industry. I've taken part of international teams in projects with different scopes such as outside and inside location, contactless payments or event detection.

- Daily meet-up with my team to discuss the current status of the sprint and sharing ideas.
- Developing of core functionalities of future products, both back-end and front-end.
- Maintaining code of active products.
- Mentoring my teammates about front-end technologies in order to grow their skill set.
- Biweekly technical calls with international partners representing my company.

Technology stack: **Angular, JavaScript, jQuery, CSS3 (SCSS, BEM), HTML5**, Android, Java (Spring).

Additional tools and knowledge: Git, Jenkins, Sonar.

02/17 - 04/18 **Software developer**

[Zelenza](#)

Tools development to perform heavy data process and calculations in different projects for Telefonica and Vodafone. Occasionally I also developed desktop applications and small scripts.

The technologies I used to accomplish my tasks were **VBA, .Net and python**.

Education

since 2018 **Master on web engineering**

[University of Oviedo](#)

Students are given a highly specialized profile in Web Engineering, with a solid background in Computer Engineering skills, providing them with the necessary management skills to make decisions in the business and institutional field in an increasingly more complex and dynamic as is the Web..

2011 - 2018 **University Degree on Computer Engineering**

[University of Oviedo](#)

Projects

02/19 - 04/19 **Angelmdex.com**

[HTML, SCSS and jQuery](#)

After months of learning some of the most-used Front-end technologies I wanted to showcase my knowledge. There is no better presentation for a Front-end Engineer than doing a personal website. At the end of the day, I'm a Web developer and it is what I love to do. .

03/19 - 03/19 **NBAManiacs**

[Angular, SCSS](#)

NBAManiacs is a sample web to show how to share simple multimedia components. It has 3 main components which are: shoutcast player, Gallery and Video Player. The gallery is able to render a full gallery by receiving an array of images. The video player is capable of render the iframe of the platform that owns the video by just passing the ID. (supports VIMEO, Youtube and Dailymotion)

12/18 - 12/18 **jQuery Components**

[Html, css3, jQuery](#)

These are 2 games made with just pure jQuery.

03/18 - 07/18 **Itaca**

[Angular + Spring application](#)

Itaca is a demo web aplicacion for school management that allows class reservation and incidence management. Technologies used: HTML5, CSS3(Bootstrap), Angular, Spring, MySQL y third-party libraries.

Certifications

2013

ESOL Level 1 Certificate in ESOL International

[Cambridge](#)

Certification that accredits B2 level of English

Programming
